

grounded in the park we won't go!

Once again, the Regents are preparing to invade and destroy People's Park. We expect that this will come down sometime in mid-June. While they are finally offering unhoused park residents indoor shelter, this does not change the the fact that People's Park is and will be a PARK FOR THE PEOPLE!

We call on all who value public open space, user development, self-determination, and the right of our community to preserve our history to resist this takeover.

DO NOT WAIT!

Now is the time to challenge the Regents for their part in creating the current housing crisis in Berkeley!

Now is the time to challenge the Berkeley City Council and Mayor Arreguin for selling out what remains of Berkeley's counter-culture, and the communities which have shared life saving resources and services when the UC and City FAILED to do so!

We must mobilize and be ready to resist the destruction of our park!
